

SteakMaker® Grower 35-0 (VP)

Type of Feed: Supplement **Form of Feed:** Pellet or Meal

General Description:

An “all natural” supplement for growing cattle on high silage or moderate legume diets, providing supplemental protein from vegetable sources.

INGREDIENTS

Grain Products, Plant Protein Products, Forage Products, Molasses Products, Dried Bakery Product, Processed Grain By-Products, Roughage Products (Not more than 40%), Vegetable Oil, Calcium Carbonate, Salt, Monocalcium/Dicalcium Phosphate, Zinc Sulfate, Sodium Selenite, Magnesium Oxide, Manganese Sulfate, Potassium Chloride, Ethylenediamine Dihydrochloride, Cobalt Carbonate, Basic Copper Chloride, Vitamin A Supplement, Vitamin D₃ Supplement, Vitamin E Supplement, Mineral Oil

FEEDING DIRECTIONS

This supplement is designed to be fed to cattle at the rate of 1 to 2 lbs/head/day. This supplement may be top dressed over feed in the bunk or mixed with grain and/or roughage prior to feeding. Provide sufficient bunk space so all cattle can eat at the same time. Cattle should have access to fresh, clean water at all times.

Available Additives:

Product No.	Options	Active Drug	Active Drug Level
1690001	NM	Non-Medicated	None
1690002	R300	Rumensin	300 g/ton
1690004	R500	Rumensin	500 g/ton
1690008	B500	Bovatec	500 g/ton

Product Features:

35% Protein, no NPN

6-7% Calcium, 0.8% Phosphorus

Adequate phosphorus for growing animals without being excessive

100% vitamin and trace mineral fortified

Available with various levels of different approved feed additives

Product Benefits:

Natural, all vegetable protein to meet protein requirements for lean growth and frame development

Balances moderate to high grain rations

Optimizes animal performance while reducing environmental concerns with manure management

No need to feed extra mineral supplements to meet requirements

Wide range of options allows diets to be targeted for specific feeding situations, improving feedlot performance

Usage Tips

SteakMaker Grower 35-0 (VP) is a protein, mineral and vitamin supplement for growing or backgrounding cattle fed a moderate to high forage based ration. This supplement is typically fed at 1.0 to 2.0 lb/h/d depending on the nutrient profile of other ration ingredients, ration energy content, age and size of cattle being fed and the medicated option used. Typically, rations with some alfalfa or barley will need only 1.0 lb/h/d, but rations with corn, milo, silage, and grass hay may need a higher level of supplementation.

SteakMaker Grower 35-0 (VP) can also be fed in combination with NPN containing liquid supplements to build growing rations with the conditioning benefits of liquid while formulating for optimal levels of NPN and natural protein.

All ration adjustments should be made on a gradual basis. Use good bunk management techniques and procedures to prevent digestive disturbances and optimize DM intake and animal performance. SteakMaker Grower 35-0 (VP) should be thoroughly mixed with grain and roughage. Follow label directions for mixing instructions.

For best results, a feeding program using Land O'Lakes Farmland Feed beef ration balancing program(s) should be developed.

Key Points

1. The amount of ration consumed should be considered in determining the proper level of additives to be fed.
2. Ideal for moderate to high forage growing and backgrounding rations.
3. A highly palatable supplement with no added urea. Ideal for young calves and situations where producers prefer not to use any urea or animal protein containing supplements.
