

SteakMaker® Co-Pass 55-25

Type of Feed: Supplement **Form of Feed:** Pellet or Meal

General Description:

This supplement is designed for high growth potential cattle weighing 400-800 lbs. It provides intact protein, by-pass protein and modest amounts of non-protein nitrogen to meet the high demands of rapidly growing cattle. It works best with silage (corn, sorghum) based growing diets.

LAND O LAKES® STEAKMAKER® CO-PASS 55-25

(For Ruminants Only)
FOR GROWING CATTLE FED IN CONFINEMENT
CAUTION: FEED AS DIRECTED

GUARANTEED ANALYSIS

Crude Protein, Not less than.....	55.0 %
(This includes not more than 25.0% equivalent crude protein from non-protein nitrogen.)	
Crude Fat, Not less than.....	1.0 %
Crude Fiber, Not more than.....	15.0 %
Calcium (Ca), Not less than.....	5.0 %
Calcium (Ca), Not more than.....	6.0 %
Phosphorus (P), Not less than.....	0.80 %
Salt (NaCl), Not less than.....	3.0 %
Salt (NaCl), Not more than.....	4.0 %
Magnesium (Mg), Not less than.....	0.5 %
Potassium (K), Not less than.....	1.0 %
Copper (Cu), ppm, Not less than.....	190
Selenium (Se), ppm, Not less than.....	4.1
Zinc (Zn), ppm, Not less than.....	650
Vitamin A, I.U./lb, Not less than.....	40,000
Vitamin D ₃ , I.U./lb, Not less than.....	10,000
Vitamin E, I.U./lb, Not less than.....	50

INGREDIENTS

Plant Protein Products, Animal Protein Products, Processed Grain By-Products, Urea, Forage Products, Molasses Products, Dried Bakery Products, Roughage Products (not more than 40%), Grain Products, Animal Fat (Preserved with BHA and Citric Acid), Monocalcium/Dicalcium Phosphate, Magnesium Oxide, Calcium Carbonate, Salt, Sodium Selenite, Potassium Chloride, Zinc Sulfate, Manganese Sulfate, Ethylenediamine Dihydriodide, Cobalt Carbonate, Basic Copper Chloride, Vitamin A Supplement, Vitamin D₃ Supplement, Vitamin E Supplement, Mineral Oil

FEEDING DIRECTIONS

This supplement is designed to be fed to cattle at the rate of 1 to 2 lbs/head/day. This supplement should be thoroughly mixed with grain and/or roughage prior to feeding. Provide sufficient bunk space so all cattle can eat at the same time. Cattle should have access to fresh, clean water at all times.

Available Additives:

Product No.	Options	Active Drug	Active Drug Level
1690103	NM	Non-Medicated	None
1690112	R300	Rumensin	300 g/ton
1690106	R400	Rumensin	400 g/ton
1690113	R500	Rumensin	500 g/ton
1690109	B400	Bovatec	400 g/ton
1690105	B600	Bovatec	600 g/ton
1690118	R400	Rumensin	400 g/ton
	H-0.4	MGA	0.4 mg/lb

Product Features:

55% Protein with 25% protein equivalents from NPN

By-pass (escape) protein

5-6% Calcium, 0.8% Phosphorus

Adequate phosphorus for growing animals without being excessive

100% vitamin and trace mineral fortified

Available with various levels of different approved feed additives

Product Benefits:

Natural protein (from vegetable and approved animal sources) and NPN to meet protein requirements and maximize animal performance with economical cost of gain

Maximizes growth rate and improves efficiency

Fortified to maintain recommended Calcium:Phosphorus ratio in most diets

Optimizes animal performance while reducing environmental concerns with manure management

No need to feed extra mineral supplements to meet requirements

Wide range of options allows diets to be targeted for specific feeding situations, improving feedlot performance

Usage Tips

SteakMaker Co-Pass 55-25 contains bypass (escape or rumen undegradable) proteins designed to maximize the performance of high growth potential calves weighing between 400 and 800 lb. Its moderate NPN level makes it ideally suited for forage-based diets containing silage (corn or sorghum). This supplement is typically fed at 1.0 to 1.5 lb/h/d depending on the nutrient profile of other ration ingredients, ration energy content, age and size of cattle being fed and the medicated option used.

All ration adjustments should be made on a gradual basis. Use good bunk management techniques and procedures to prevent digestive disturbances and optimize dry matter intake and animal performance. Medicated SteakMaker Co-Pass 55-25 supplements should be thoroughly mixed with grain and roughage. Follow label directions for mixing instructions.

For best results, a feeding program using Land O'Lakes Farmland Feed beef ration balancing program(s) should be developed.

Key Points

1. By-pass protein to maximize calf growth is provided by approved sources of animal proteins. The blend of protein sources provides a high quality amino acid profile that enables high growth calves to maximize their potential.
2. Moderate NPN level for economical cost of gain while providing the rumen microbial population with important degradable protein.
3. All feeds containing a moderate to high amounts of NPN can absorb moisture during periods of high relative humidity. The supplement may become hard in the sack or bridge in bulk bins. In extreme cases, pellets may become soft and crumble easily.
4. Designed to balance high-silage (corn and sorghum) rations.
