

SteakMaker® 60-30

Type of Feed: Supplement **Form of Feed:** Pellet

General Description:

This high-protein supplement is designed for finishing cattle needing more protein in their diet. The high calcium level allows this product to be used in high grain/no legume rations.

LAND O LAKES® STEAKMAKER® 60-30

(For Ruminants Only)

FOR GROWING AND FINISHING CATTLE FED IN CONFINEMENT

CAUTION: FEED AS DIRECTED

GUARANTEED ANALYSIS

Crude Protein, Not less than.....	60.0 %
(This includes not more than 30.0% equivalent crude protein from non-protein nitrogen.)	
Crude Fat, Not less than.....	2.0 %
Crude Fiber, Not more than.....	12.0 %
Calcium (Ca), Not less than.....	8.5 %
Calcium (Ca), Not more than.....	9.5 %
Phosphorus (P), Not less than.....	0.5 %
Salt (NaCl), Not less than	3.5 %
Salt (NaCl), Not more than.....	4.5 %
Magnesium (Mg), Not less than.....	0.8 %
Potassium (K), Not less than.....	3.0 %
Copper (Cu), ppm, Not less than.....	190
Selenium (Se), ppm, Not less than.....	4.1
Zinc (Zn), ppm, Not less than.....	650
Vitamin A, I.U./lb, Not less than.....	40,000
Vitamin D ₃ , I.U./lb, Not less than.....	10,000
Vitamin E, I.U./lb, Not less than.....	50

INGREDIENTS

Plant Protein Products, Processed Grain By-Products, Roughage Products (not more than 40%), Forage Products, Dried Bakery By-Products, Molasses Products, Animal Fat, Animal Protein Products, Grain Products, Monocalcium/Dicalcium Phosphate, Magnesium Oxide, Urea, Ammonium Sulfate, Potassium Chloride, Zinc Sulfate, Manganese Sulfate, Basic Copper Chloride, Cobalt Carbonate, Sodium Selenite, Mineral Oil, Salt, Calcium Lignin Sulfonate, Ethylenediamine Dihydriodide, Vitamin A Supplement, Vitamin D₃ Supplement, Vitamin E Supplement

FEEDING DIRECTIONS

This supplement is designed to be fed to cattle at the rate of 0.75 to 1.5 lbs/head/day. This supplement must be mixed with grain and/or roughage prior to feeding. Provide sufficient bunk space so all cattle can eat at the same time. Cattle should have access to fresh, clean water at all times.

Available Additives:

Product No.	Options	Active Drug	Active Drug Level
1690178	NM	Non-Medicated	None
1690179	R400	Rumensin	400 g/ton
1690180	R500	Rumensin	500 g/ton
1690186	R500	Rumensin	500 g/ton
	H-0.4	MGA	0.4 mg/lb
1690260	R500	Rumensin	500 g/ton
	T180	Tylan	180 g/ton
	H0.4	MGA	0.4 m g/lb
1690261	B500	Bovatec	500 g/ton
	AU700	Aureomycin	700 g/ton

Product Features:

60% Protein, 30% maximum from NPN

8.5-9.5% Calcium

Adequate but not excessive phosphorus content

Contains ammonium sulfate to provide a source of sulfur to balance high NPN rations

100% vitamin and trace mineral fortified

Available with various levels of different approved feed additives

Product Benefits:

Natural protein and NPN to meet protein requirements and maximize animal performance with economical cost of gain

Balances high-grain rations; helps prevent water belly (urinary calculi)

Optimizes animal performance while reducing environmental concerns with manure management

Adequate dietary sulfur is required for normal rumen function. With adequate sulfur, there is more protein (specifically methionine) and energy available for animal growth. The end result is better cattle performance.

No need to feed extra mineral supplements to meet requirements

Wide range of options allows diets to be targeted for specific feeding situations, improving feedlot performance

Usage Tips

SteakMaker 60-30 is a nutrient dense beef supplement best used in high-grain diets with modest amounts of grass hay or silage as the roughage source. SteakMaker 60-30 is typically fed at 0.75 to 1.5 lb/head/day.

All ration adjustments should be made on a gradual basis. Use good bunk management techniques and procedures to prevent digestive disturbances and optimize DM intake and animal performance. SteakMaker 60-30 should be thoroughly mixed with grain and roughage. Do not top dress or feed separately. Follow label directions for mixing instructions.

For best results, a feeding program using Land O'Lakes Farmland Feed beef ration balancing program(s) should be developed.

Key Points

1. The amount of ration consumed should be considered in determining the proper level of additive to be fed.
2. The high nutrient density of SteakMaker 60-30 allows a low inclusion rate in rations built around feedstuffs with low protein content.
3. All feeds containing a moderate to high amounts of NPN can absorb moisture during periods of high relative humidity. The supplement may become hard in the sack or bridge in bulk bins. In extreme cases, pellets may become soft and crumble easily.
