

# SteakMaker® 40-20 (VP)

**Type of Feed:** Supplement      **Form of Feed:** Pellet or Meal

## General Description:

This economical plant protein based supplement is designed for growing and finishing cattle. The calcium level (7-8%) balances most grain based or silage-based diets with modest amounts of legume forages.

**LAND O LAKES®**  
**SteakMaker® 40-20 (VP)**  
 FOR GROWING AND FINISHING CATTLE FED IN CONFINEMENT

**CAUTION: FEED AS DIRECTED**

### GUARANTEED ANALYSIS

Crude Protein, (Min).....	40.0 %
(This includes not more than 20.0% equivalent crude protein from non-protein nitrogen.)	
Crude Fat, (Min).....	2.0 %
Crude Fiber, (Max).....	12.0 %
Calcium (Ca), (Min).....	7.0 %
Calcium (Ca), (Max).....	8.0 %
Phosphorus (P), (Min).....	0.50 %
Salt (NaCl), (Min).....	3.5 %
Salt (NaCl), (Max).....	4.5 %
Magnesium (Mg), (Min).....	0.8 %
Potassium (K), (Min).....	3.0 %
Copper (Cu), ppm, (Min).....	190
Selenium (Se), ppm, (Min).....	4:1
Zinc (Zn), ppm, (Min).....	650
Vitamin A, I.U./lb, (Min).....	40,000
Vitamin D <sub>3</sub> , I.U./lb, (Min).....	10,000
Vitamin E, I.U./lb, (Min).....	50

### INGREDIENTS

Plant Protein Products, Processed Grain By-Products, Urea, Forage Products, Molasses Products, Dried Bakery Product, Grain Products, Roughage Products (not more than 40%), Monocalcium/Dicalcium Phosphate, Vegetable Oil, Calcium Carbonate, Salt, Potassium Chloride, Magnesium Oxide, Sodium Selenite, Zinc Sulfate, Manganese Sulfate, Ethylenediamine Dihydriodide, Cobalt Carbonate, Basic Copper Chloride, Vitamin A Supplement, Vitamin D<sub>3</sub> Supplement, Vitamin E Supplement, Mineral Oil

### DIRECTIONS FOR USE

This supplement is designed to be fed to cattle at the rate of 0.75 to 1.5 lbs/head/day. This supplement must be mixed with grain and/or roughage prior to feeding. Provide sufficient bunk space so all cattle can eat at the same time. Cattle should have access to fresh, clean water at all times.

## Available Additives:

Product No.	Options	Active Drug	Active Drug Level
1690235	NM	Non-Medicated	None
1690236	R400	Rumensin	400 g/ton
1690237	R500	Rumensin	500 g/ton
1690246	B600	Bovatec	600 g/ton

**Product Features:**

40% Protein, 20% maximum from NPN

7-8% Calcium, 0.5% Phosphorus

Adequate phosphorus for growing animals without being excessive

100% vitamin and trace mineral fortified

Available with various levels of different approved feed additives

**Product Benefits:**

Vegetable protein and moderate level of NPN to meet protein requirements and maximize animal performance with economical cost of gain

Balances moderately high-grain rations; helps prevent water belly (urinary calculi)

Optimizes animal performance while reducing environmental concerns with manure management

No need to feed extra mineral supplements to meet requirements

Wide range of options allows diets to be targeted for specific feeding situations, improving feedlot performance

**Usage Tips**

SteakMaker 40-20 (VP) is a plant protein and NPN containing supplement for growing and finishing cattle. It is ideal for use in moderate to high grain diets. It can fit well in these diets when fed with a wide range of roughage sources. It is typically fed at 0.75 to 1.5 lb/h/d depending on the nutrient profile of other ration ingredients, ration energy content, age and size of cattle being fed and the medicated option used.

All ration adjustments should be made on a gradual basis. Use good bunk management techniques and procedures to prevent digestive disturbances and to optimize DM intake and animal performance. SteakMaker 40-20 (VP) should be thoroughly mixed with grain and roughage prior to feeding. Do not top dress or feed separately. Follow label directions for mixing instructions.

For best results, a feeding program using Land O'Lakes Farmland Feed beef ration balancing program(s) should be developed.

**Key Points**

1. The amount of ration consumed should be considered in determining the proper level of additive to be fed.
2. Ideal for situations where one supplement is needed for both growing and finishing cattle.
3. The modest level of NPN allows this product to be used in areas with higher humidity than other beef finishing supplements, yet has enough NPN to optimize the cost of protein supplementation.
4. All feeds containing a moderate to high amounts of NPN can absorb moisture during periods of high relative humidity. The supplement may become hard in the sack or bridge in bulk bins. In extreme cases, pellets may become soft and crumble easily.
5. Ideal for feeding situations where producers prefer not to use supplements containing animal proteins.
