Product Features:

28% Calcium, no added Phosphorous

Vitamin and trace mineral fortified

Designed to be fed at 0.3 to 0.4 lb/head daily

Product Benefits:

Provides supplemental calcium in diets with high levels of grain, distillers grains or gluten feed.

Supports skeletal growth and immune system function; meets animal requirements.

Modest supplement cost; helps to reduce feed inventory costs.

Usage Tips

SteakMaker® Co-Product Formulator is a high calcium mineral supplement designed to be used in high-energy rations that contain adequate protein. Such rations may contain high grain and/or high grain by-products such as distiller's grains or gluten feed.

Recommended feeding rates of SteakMaker® Co-Product Formulator 0.4 lb per head daily. Thoroughly mix SteakMaker® Co-Product Formulator with the non-medicated ration prior to feeding.

Key Points

1. Use in high corn/corn by-product rations when extra protein is not needed.
2. The modest feeding rates lower cost of supplementation and supports cost of gain.
3. Provides proper level of vitamins, minerals and feed additives when fed according to label directions.
