INGREDIENTS

Monocalcium/Dicalcium Phosphate, Calcium Carbonate, Salt, Distillers Dried Grains with Solubles, Yeast Culture, Molasses Products, Magnesium Oxide, Sodium Selenite, Zinc Sulfate, Manganese Sulfate, Iron Oxide, Basic Copper Chloride, Ethylenediamine Dihydriodide, Cobalt Carbonate, Vitamin A Supplement, Vitamin D₃ Supplement, Vitamin E Supplement, Mineral Oil, Natural and Artificial Flavor

DIRECTIONS FOR USE

PRO-PHOS 8 LS MINERAL is recommended for free-choice feeding to all cattle which are in areas where low salt minerals are necessary and are receiving rations composed largely of grass hay or for cattle grazing range or grass pastures. Optimum intake is 2 to 4 oz per head daily. Maximum intake is 4.8 oz (0.3 lb) per head daily.

Cattle, which have been receiving phosphorus-deficient diets, may over-consume PRO-PHOS 8 LS MINERAL when it is first offered. During the first 5 to 7 days of free-choice feeding, limit the intake to 1 lb for each 5 to 8 head per day.

To assure adequate mineral intake, remove all other salt and mineral products. Have an adequate water supply available and place the mineral feeder near the water supply or in the animals' loafing area. Put out fresh mineral at least once a week. An upright covered mineral feeder is recommended to protect the mineral from weather.

DO NOT FEED TO SHEEP OR GOATS DUE TO HIGH LEVELS OF SUPPLEMENTAL COPPER.

FERMENTATION FORTIFIED WITH DIAMOND V XP™ YEAST CULTURE.

Product Features:

Contains 8% Phosphorus which fits well into year-round mineral supplementation in most geographic regions

Provides optimum levels of trace minerals at a 3 ounce consumption rate

Low Salt

Contains distillers dried grains with solubles

Contains Diamond V's "XP" yeast culture for improved mineral palatability

Product Benefits:

Provides necessary phosphorus, vitamins and other trace minerals for improved growth rate and reproduction

Aids in disease prevention, improves fertility, and promotes fetal development

Designed for alkaline areas where mineral intake is typically low

Improved palatability and more consistent intake

Better palatability helps maintain consistent feed intake.

Usage Tips

Pro-Phos 8 Minerals can be fed to all cattle on medium quality range or grass. Optimum intake is 2-4 oz. per head daily and may vary according to medication option. Read and follow label directions, **some are not designed to be fed free-choice!**

To assure adequate mineral intake, **remove all other salt and mineral products**. Have an adequate water supply available and place the mineral feeder near the water supply or in the animals' loafing areas. Put out fresh mineral at least once a week. An upright covered mineral feeder is recommended to protect the mineral.

CAUTION: Do not feed to sheep or allow sheep access to this mineral because of the high level of supplemental copper.

Key Points

1. Ideal for breeding and growing cattle on medium-quality range or grass pasture.
2. Use one mineral for whole herd; lactating and breeding cows, replacement heifers and bulls, or summer stocker cattle.
3. Complete macro mineral, trace mineral and vitamin supplement.
4. High copper formulas available for areas with chronic copper deficiencies or areas with copper antagonists (high environmental molybdenum, sulfur or iron).
5. Fescue minerals specially formulated for meeting requirements and overcoming deficiencies of cattle grazing fescue pastures.
6. Tasco option helps increase grazing time of cattle in fescue based pastures
7. Pro Phos 8 LS (low salt) is designed for areas where salt content of the water or soil is high.
