FEEDING DIRECTIONS

Feed this product free choice to cattle receiving rations composed largely of grass hay or to cattle grazing range or grass pastures. Optimum intake is 4 ounces per head per day.

Cattle receiving phosphorus deficient diets may over-consume this product when it is first offered. Place the mineral feeder near the water supply or in the animals' loafing area. Put out fresh mineral at least once per week. Feeding free choice salt is not required with this mineral. Provide fresh, clean water near the feeding area.

INGREDIENTS

Monocalcium Phosphate, Dicalcium Phosphate, Processed Grain By-Products, Salt, Calcium Carbonate, Plant Protein Products, Molasses Products, Lignin Sulfonate, Potassium Chloride, Silica Dioxide, Magnesium Oxide, Mineral Oil, Zinc Sulfate, Sodium Selenite, Iron Oxide, Manganese Sulfate, Copper Chloride, Vitamin A Supplement, Natural and Artificial Flavor, Vitamin E Supplement, Ethylenediamine Dihydriodide, Vitamin D₃ Supplement, Cobalt Carbonate

Available Options:

Product No.	Options	Mineral Name
1990199	12% Phosphorus	RangeLand Late Season 12 CP Mineral
1990239	12% Phos, Altosid, Aureomycin, 2800g/ton	RangeLand Late Season 12 CP Altosid AU-2800

Product Features:

Contains large particle size ingredients and rain protection

High phosphorus level (12%)

Provides optimum levels of trace minerals at a 4 ounce consumption rate

**Product Benefits:**

Resistant to wind losses and rain damage.

Excellent source for replenishing phosphorus in cattle not on a year-round mineral program. Provides necessary phosphorus for fetal development and reproduction

Aids in disease prevention, improves fertility, and promotes fetal development

Improves palatability, better palatability helps maintain consistent feed intake.

Usage Tips

RangeLand® Late Season 12 CP MINERAL is recommended for feeding to all cattle on diets composed largely of grass hay or for cattle grazing low quality range or grass pastures such as those found late in the grazing season. Optimum intake is 4 oz. per head daily.

To assure adequate mineral intake, **remove all other salt and mineral products**. Have an adequate water supply available and place the mineral feeder near the water supply or in the animals' loafing areas. Put out fresh mineral at least once a week.

Key Points

1. Resistant to wind loss and rain damage.
2. Use as a replenishing mineral.
3. Provides balanced levels of calcium, phosphorus and salt.
4. Ideal for feeding cattle on dormant or other low quality forage.
5. Complete macro mineral, trace mineral and vitamin supplement.
