Usage Tips

RangeLand® Fescue 8 Minerals can be fed to all cattle on medium quality range or grass. Optimum intake is 2 oz. per head daily and may vary according to medication option. Read and follow label directions.

To assure adequate mineral intake, **remove all other salt and mineral products**. Have an adequate water supply available and place the mineral feeder near the water supply or in the animals’ loafing areas. Put out fresh mineral at least once a week.

Key Points

1. For breeding and growing cattle on fescue pasture and hay.
2. Use one mineral for whole herd; lactating and breeding cows, replacement heifers and bulls, or summer stocker cattle.
3. Complete macro mineral, trace mineral and vitamin supplement.
4. Fescue minerals specially formulated for meeting requirements and overcoming deficiencies of cattle grazing fescue pastures.
5. Tasco option helps increase grazing time of cattle in fescue based pastures.
